HO, HUM! ALMA GLUCK'S SLEEP CURE APPROVED BY DOCTORS

Really a Development of Dr. Weir Mitchell's "Rest Cure." Builds Up Tissue Exhausted by Nervous Fatigue

Please go away and let me sleep. And don't disturb my slumbers deep. For I would rather sleep than eat. Sleep to me is like a treat, treat, treat.

Alma Gluck, the song bird of the Metropolitan, who left recently for Europe, declared she had no plans except to sleep.

A week in bed on the ship going over, she said; a week of slumber in London, night boat to France, where she will board a night train for Paris. In Paris another week like the one on the Atlantic steamer—sleep.

After a week of slumber in Paris, Madame will take a sleeper to Venice, where her tour will end with a week's slumber.

Her plan to spend her vacation resting like the Metropolitan is the Philadelphia cure, as it is evidently developed from the "rest cure" of a noted Philadelphia.

The late Dr. S. Weir Mitchell, whose life was chiefly devoted to the study of nervous conditions, required the absolute isolation of the patient in his "rest cure." No friends or relatives were permitted communication.

This system of scientific rest has now its supporters in all parts of the world. Dr. Elmer Eymann, resident physician at the Pennsylvania Hospital for the Insane, says that in his opinion "there is much to recommend such a period of rest as Alma Gluck contemplates, provided, however, it is properly supervised and under a doctor's orders."

"For a well person simply to go to bed without any specific cause," he went on, "would result in harm if only from the atrophying effects of placing the muscles of the body in disuse."

"But where a person, either as a result of a long period of mental strain or from the infection of disease is not in full vigor, there is a necessity for such a rest. That is obvious."

"The mere reclining of the body, however, is not enough. It is necessary to have the strain on the heart is a benefit to all ill persons that offsets all the temporary advantage gained by them by their not going to bed."

Dr. L. A. Hamilton, attached to the staff of the Jefferson Hospital, subscribes to the views of Dr. Eymann. "Perhaps the only feature of the idea which represents trouble to the doctor," he said, "is the inability to have people stay in bed. For unless a man or woman or child is actually confined to bed by disability, you can't keep them in bed, that's all."

"Sleep," says Louis, with one eye cocked on the downy softness of the beds stretched out in file and flank in the wards. "Sleep is something you can give all your troubles to and it takes your pains and gives nothing in return but refreshment."

But the question of sleep is a moot one. Three whole pages of fine print are devoted to its explanation in the encyclopedia. Arguments as to what causes it, and how it makes it necessary and when have been going on for centuries.

Comfort is Fashionable

Wherever you go nowadays you will find a great many of the smarter women wearing Cantilever Shoes.

At the Bellevue-Stratford, in trim tailored suits with Cantilevers just as trim, you will see them at the best of advantage.

In comfortable sport clothes and Cantilevers, in New York, San Francisco, Philadelphia, everywhere.

For comfort has become fashionable today and Cantilevers have the trim lines that harmonize with the ideas of American women.

Like the foot the arch of the Cantilever Shoe is flexible. Your foot muscles, relieved of the restraint of the ordinary stiff sole, are encouraged to exercise, your blood to circulate, your arch to grow strong.

The very first day you try Cantilevers you will feel the delightful ease caused by the well-placed heels, the natural inner sole-line, the thoroughly scientific construction that makes a Cantilever shoe.

You'll like their style, too. Widths from AAAA to E.
